Tom has 3 boxes. One contains only apples, one contains only oranges, and one contains both apples and oranges. The boxes are incorrectly labeled. If you can pick only one fruit from one box to correctly label all boxes, how can you do it?

Solution:

- Pick one fruit from the box labeled "Mixed."
- Since the label is wrong, this box does not contain both fruits. It must contain only apples or only oranges.
- If you pick an apple from this box, then:
 - The box labeled "Oranges" cannot contain only oranges (since labels are wrong), so it must contain both fruits.
 - The remaining box, labeled "Apples," must contain only oranges.

This process allows you to correctly label all boxes with just one pick.

Answer: By drawing one fruit from the box labeled "Mixed" and using the process of elimination.
