Components of the Mower Deck Belt System

- Engine Pulley

This is the primary drive pulley attached directly to the engine. It powers the belt when the engine runs.

- Deck Pulleys
 - Main Blade Pulleys: Drive the individual blades.
 - Idler Pulleys: Guide the belt and maintain tension.
- Belt Tensioner

A spring-loaded pulley or tensioner arm that maintains proper belt tension to prevent slipping.

- Blades

Connected via the pulleys, they are responsible for cutting grass efficiently.

Typical Mower Deck Belt Diagram for Gravely

While specific diagrams vary by model, a typical Gravely mower deck belt routing follows a similar pattern:

- The belt begins at the engine pulley.
- It wraps around the main deck pulley(s) and the idler pulleys.
- It loops around each blade pulley, driving the blades.
- The tensioner pulley maintains appropriate tension throughout.

Below is a general step-by-step description of the routing:

Step 1: Starting Point

- Attach the belt to the engine pulley located at the mower's rear or side, depending on the model.

Step 2: Routing to the Blade Pulleys

- Guide the belt around the center deck pulley (or pulleys if multiple blades are present).
- Continue routing around the idler pulley, ensuring it is correctly positioned to maintain tension.

Step 3: Engaging the Blades

- Wrap the belt around each blade pulley, aligned with the corresponding blade.

Step 4: Tensioning

- Ensure the belt passes over the tensioner pulley or arm, which applies tension to prevent slipping during operation.

Step 5: Final Routing

- Double-check the routing path, ensuring the belt is seated properly in all pulley grooves.

Visualizing the Diagram

While a visual diagram is ideal, here is a simplified textual representation of the belt path:
