Interestingly, the heart pumping to the body stops beating when the octopus swims. Can lightning strike the same place twice? Absolutely. Lightning can and often does strike the same location multiple times, especially tall, isolated objects like skyscrapers or lightning rods. The Empire State Building, for example, is struck numerous times each year. Is there a place on Earth where you can stand in two different countries at once? Yes, there are locations such as the border between Bangladesh and

India, where you can stand with one foot in each country, like at the Hili border area or the famous 'border walk' in certain regions. Did a person really survive after being frozen solid and then thawed out? While the idea sounds like science fiction, there have been experiments with animals and some rare cases involving humans in medical cryopreservation, but no one has yet been fully frozen and then revived to normal life as often depicted in movies. Is it true that some animals can survive in space? Yes, certain microorganisms called tardigrades, or water bears, can survive the vacuum of space, extreme radiation, and very high or low temperatures, making them some of the toughest creatures on Earth. Can a person really have a condition where they can see without eyes? There are rare cases of individuals with a condition called 'visual synesthesia' or 'eyeless sight,' where they report visual experiences without traditional eyesight, often linked to brain activity or hallucinations, but true sight without eyes remains extraordinary and extremely rare.
