- "Can happiness be an ethical goal?"
- "Does freedom imply responsibility?"

Students must select a topic that resonates with their interests and allows for a nuanced exploration.

Crafting a Precise and Engaging Problem

A successful dissertation hinges on a well-formulated problem statement. For example, rather than asking, "What is happiness?", a more analytical question would be, "Can happiness be achieved independently of external circumstances?" This refines the focus and guides subsequent arguments.

Developing a Coherent and Persuasive Argument

Building the Plan

Effective dissertations typically follow a logical progression:

- Part 1: Defining the key concepts (e.g., freedom, knowledge, happiness).
- Part 2: Exploring the conditions or limitations (e.g., external constraints, subjective perceptions).
- Part 3: Offering a synthesis or critical perspective (e.g., balancing individual liberty with social responsibility).

Supporting Arguments with Philosophical Texts

Integrating quotations and ideas from philosophers like Descartes, Kant, Nietzsche, or Sartre enriches the discourse and demonstrates familiarity with the curriculum.

Using Examples and Thought Experiments

Concrete examples or hypothetical scenarios help illustrate abstract ideas and make arguments more tangible.

Practical Tips for Crafting a Standout Dissertation

Time Management

- Allocate time for each phase: understanding the topic, planning, writing, and reviewing.
- Practice under timed conditions to simulate exam pressure.

Clarity and Style

- Write in clear, concise language.
- Avoid overly complex sentences that may confuse readers.
- Use transitions to connect ideas smoothly.

Revision and Refinement

- Leave time for proofreading.
- Check for logical coherence, grammatical accuracy, and adherence to the plan.

Common Pitfalls and How to Avoid Them

- Vagueness: Avoid vague statements; be specific in your arguments.
- Over-reliance on quotations: While references are important, your own reasoning must take center stage.
- Ignoring the question: Always ensure your discourse directly addresses the formulated problem.
- Lack of structure: A disorganized dissertation undermines credibility; stick to a clear plan.

Preparing for the Oral Defense (The "Big Oral")

Although the focus here is on the written dissertation, it's worth noting that the oral presentation is equally critical:

- Practice summarizing your dissertation succinctly.
- Be ready to answer questions and defend your reasoning.

- Engage with examiners confidently and respectfully.
