Problem 1: Solving Supply and Demand Equations

Suppose the demand function is $(Q_d = 100 - 2P)$, and the supply function is $(Q_s = 20 + 3P)$. Find the equilibrium price and quantity.

- Set $(Q_d = Q_s)$:

$$(100 - 2P = 20 + 3P)$$

- Combine like terms:

$$(100 - 20 = 3P + 2P)$$

$$(80 = 5P)$$

- Calculate (P) :

$$(P = \frac{80}{5} = 16)$$

- Find (Q) using either function:

$$[Q_d = 100 - 2(16) = 100 - 32 = 68]$$

or

$$[Q_s = 20 + 3(16) = 20 + 48 = 68]$$

Answer: Equilibrium price is \$16, and equilibrium quantity is 68 units.

Problem 2: Calculating Consumer Surplus

Given the demand function $(Q_d = 50 - 2P)$ and market price \$10, calculate the consumer surplus.

- Find maximum willingness to pay when $(Q_d = 0)$:

$$[0 = 50 - 2P \rightarrow P = 25]$$

- Consumer surplus is the area of the triangle between the demand curve and the market price:

$$[\text{Consumer Surplus} = \frac{1}{2} \times \text{Base} \times \text{Height}]$$

- Base: Quantity at market price:

$$[Q_d = 50 - 2(10) = 50 - 20 = 30]$$

- Height:

$$[25 - 10 = 15]$$

- Calculate:

$$[\frac{1}{2} \times 30 \times 15 = 225]$$

Answer: Consumer surplus is \$225.

Question: The table below shows the number of students choosing different subjects:

| Subject | Number of Students |

|-----|-----|

| Mathematics | 250 |

| Mathematical Literacy | 150 |

| Physical Science | 200 |

| Life Sciences | 180 |

Solution Highlights:

- Calculating total students:

Total = $250 + 150 + 200 + 180 = 780$ students.

- Finding the percentage of students choosing Mathematical Literacy:

Percentage = $(150 / 780) \times 100 \approx 19.23\%$.

Educational Point: Learners should be comfortable with basic data analysis, calculating percentages, and drawing conclusions that relate to real-world contexts.

Question 2: Financial Calculation ? Simple Interest

Question: A learner invests R2000 at a simple interest rate of 8% per annum. Calculate the interest earned after 3 years.

Solution:

- Formula for simple interest:

\[

$$I = P \times r \times t$$

\\

where:

- (P) = principal amount = R2000
- (r) = interest rate = 8% = 0.08
- (t) = time in years = 3

- Calculation:

\\

$$I = 2000 \times 0.08 \times 3 = R480$$

\\

Result: The interest earned after 3 years is R480.

Educational Point: The memorandum highlights the importance of understanding formulas and their application in financial contexts.

Question 3: Estimation and Measurement

Question: Estimate the total volume of water in a rectangular tank measuring 2 meters in length, 1.5 meters in width, and 1 meter in height.

Solution:

- Calculation of volume:

\\

$$\text{Volume} = \text{length} \times \text{width} \times \text{height}$$

\\

\[

$$= 2 \times 1.5 \times 1 = 3 \text{ \text{cubic meters}}$$

\]

- Conversion to liters:

Since 1 cubic meter = 1000 liters,

\[

$$3 \times 1000 = 3000 \text{ \text{liters}}$$

\]

Educational Point: Learners should be able to estimate measurements and convert units correctly, a vital skill in various practical scenarios.

By simplifying complex concepts and offering actionable knowledge, the book contributes meaningfully to the broader goal of financial literacy.

Comparison with Alternative Resources

While Globe Fearon's publication offers a well-rounded introduction, several other resources and books target similar audiences:

- "Mathematics for Consumers" by John Smith ? Focuses more on theoretical underpinnings with less practical emphasis.
- Online Platforms like Khan Academy or Coursera ? Offer interactive lessons and up-to-date content but may lack the structured, print-based guidance of Fearon's book.
- Financial Literacy Programs ? Often include workshops and personalized coaching, which provide tailored learning experiences beyond what a book can offer.

Compared to these, Practical Mathematics for Consumers stands out for its accessibility, structured approach, and tangible applicability, making it an excellent starting point for learners seeking to improve their everyday financial skills.
