They are designed to complement the IFRS standards issued by the International Accounting Standards Board (IASB) and are aligned with relevant standards such as IFRS 9 (Financial Instruments), IFRS 15 (Revenue from Contracts with Customers), IFRS 16 (Leases), and IFRS 12 (Disclosure of Interests in Other Entities), among others.

Key Sections Covered in Volume 2 Slides:

Each section typically includes definitions, recognition and measurement criteria, journal entries, disclosures, and practical examples.

Deep Dive into Core Topics

- Financial Instruments (IFRS 9)

Financial instruments are fundamental to business operations and financial reporting. The IFRS 9 standard introduces a comprehensive model for classification and measurement, impairment, and hedge accounting.

Key Concepts:

- Classification and Measurement: Financial assets are classified into amortized cost, fair value through other comprehensive income (FVOCI), or fair value through profit or loss (FVTPL). The classification depends on the business model and contractual cash flow characteristics.
- Impairment: An expected credit loss model replaces the incurred loss approach, requiring entities to recognize impairment allowances based on expected future losses.
- Hedge Accounting: The standard aligns hedge accounting more closely with risk management strategies, allowing for more transparent reporting.

Practical Application:

- Recognizing and measuring financial assets upon initial recognition.
- Calculating impairment allowances using simplified or complex models.
- Documenting hedge relationships and assessing hedge effectiveness.

- Revenue Recognition (IFRS 15)

IFRS 15 provides a robust framework for revenue recognition, emphasizing the transfer of control rather than the transfer of risks and rewards.

Steps in Revenue Recognition:

- Identify the contract with the customer.
- Identify the performance obligations within the contract.
- Determine the transaction price.
- Allocate the transaction price to each performance obligation.
- Recognize revenue when (or as) the entity satisfies each obligation.

Key Principles:

- Revenue is recognized when control of goods or services transfers to the customer.
- Variable consideration is estimated and constrained.
- Significant financing components are adjusted for.

Practical Tips:

- Dissect complex contracts to identify distinct performance obligations.
- Use stand-alone selling prices to allocate transaction prices.
- Recognize revenue over time or at a point in time, depending on the nature of the performance obligation.

- Leases (IFRS 16)

IFRS 16 revolutionized lease accounting, especially for lessees, by bringing most leases onto the balance sheet.

Major Changes:

- Recognition of a right-of-use asset and a lease liability for all leases exceeding 12 months unless exempt.
- Lessor accounting remains similar to previous standards but with some modifications.

Lease Classification:

- Finance lease (as per previous standards) now primarily governs lessor accounting.
- For lessees, all leases are treated as finance leases, leading to increased assets and liabilities.

Implementation Steps:

- Identifying lease contracts.
- Calculating the right-of-use asset and lease liability, discounting future lease payments.
- Recognizing depreciation expense and interest expense over lease term.

Practical Examples:

- Accounting for office space leases.
- Lease modifications and remeasurements.
- Disclosures required under IFRS 16.

Advanced Topics: Income Taxes and Employee Benefits

- Income Taxes (IAS 12)

IAS 12 deals with accounting for current and deferred taxes arising from taxable temporary differences.

Key Areas:

- Recognizing current tax liabilities or assets based on taxable income.
- Measuring deferred tax assets and liabilities using the balance sheet approach.
- Valuing deferred taxes at the tax rates expected to apply when the asset is realized or the liability settled.

Complexities:

- Uncertain tax positions.
- Recognition of deferred tax assets for carryforward losses.
- Impact of tax rate changes.

Practical Considerations:

- Calculating temporary differences.
- Assessing recoverability of deferred tax assets.
- Disclosures regarding tax uncertainties.

- Employee Benefits (IAS 19)

IAS 19 covers short-term, post-employment, other long-term, and termination benefits.

Key Points:

- Recognition of the obligation when the employee renders service.
- Measurement of obligations using actuarial assumptions.
- Recognizing service cost, interest cost, and remeasurements.

Practical Examples:

- Pension plan accounting.
- Post-employment medical benefits.
- Share-based compensation plans.

- Practice journal entries: Recreate journal entries based on the scenarios presented.
- Understand measurement bases: Grasp the difference between fair value, amortized cost, and other measurement bases.
